ABOUT US

HIGHLIGHTS

MAVEN is a leading provider of specialized concrete repair solutions, concrete strengthening work, waterproofing services and concrete cutting services. It has established itself as a trusted and reliable partner for market clients, delivering high-quality services with a focus on safety, efficiency, and excellence.

MAVEN Team of skilled professionals brings years of experience and expertise to every project, whether repairing cracks, restoring structural strength, or cutting concrete to precise specifications. Maven is always committed to using the latest technology and tools to provide innovative solutions that meet the needs of The clients.

Whether you're looking for concrete repair solutions, concrete strengthening work, waterproofing services, or concrete cutting services, MAVEN has the expertise and resources to get the job done right. We take pride in our commitment to quality and customer satisfaction, and we look forward to partnering with you on your next project

“

YOUR SATISFACTION IS OUR SUCCESS.

”

SERVICES

CONCRETE & CRACK REPAIR

- Concrete Repair
- Crack Injection

STRUCTURAL STRENGTHENING

- Concrete Jacketing
- Fibre Reinforced Polymer Composites Jacketing (CERP)

WATERPROOFING

- Bituminous System
- Polyvinyl Chloride (PVC System)
- Thermoplastic Olefin (TPO)
- Ethylene Propylene Diene Monomer or Terpolymer (EPDM)
- Liquid Waterproofing Coatings

CONCRETE CUTTING

- Wall sawing
- Wire sawing
- Floor sawing
- Hand & Ring Saw

CONCRETE DRILLING

- Standard Core Drilling
- Stitch core drilling
- Deep Drilling System

CONCRETE DEMOLITION

- Soft Demolition
- Robotic Demolition

OTHER SERVICES

- Rebar Anchoring
- Rebar Scanning & Post Tension Scanning

| PROJ

PROJECTS

حكومة الشارقة
GOVERNMENT OF SHARJAH

Sharjah Stadium - Al Hazzanah, Sharjah

CLIENT

Department of Public Works - Government of Sharjah

SCOPE OF WORK

- 1- Rehabilitation and renovation works of Football Stadium
- 2- Rehabilitation and renovation works Of Covered hall building

WORK DESCRIPTION

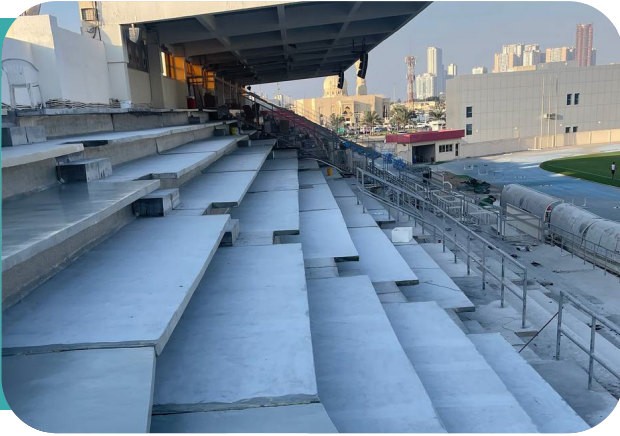

- A. Demolition and removal of the deteriorated concrete and rusted rebars
- B. Anchoring & Installation of the new reinforcement
- C. Formwork installation to create a framework for pouring the new concrete.
- D. Casting Micro Concrete
- E. Curing methods to keep the concrete moist and protected from rapid drying.
- F. Concrete and plaster crack repair
- G. Repair of Expansion joint for concrete slabs and walls
- H. Comprehensive waterproofing and moisture remediation solutions
- I. Floor Coating for stadium stands
- J. Supply and fixing of stadium seats & VIP seats

King Fahd Airport - Dammam

CLIENT

Dammam Airports Company (DACO)

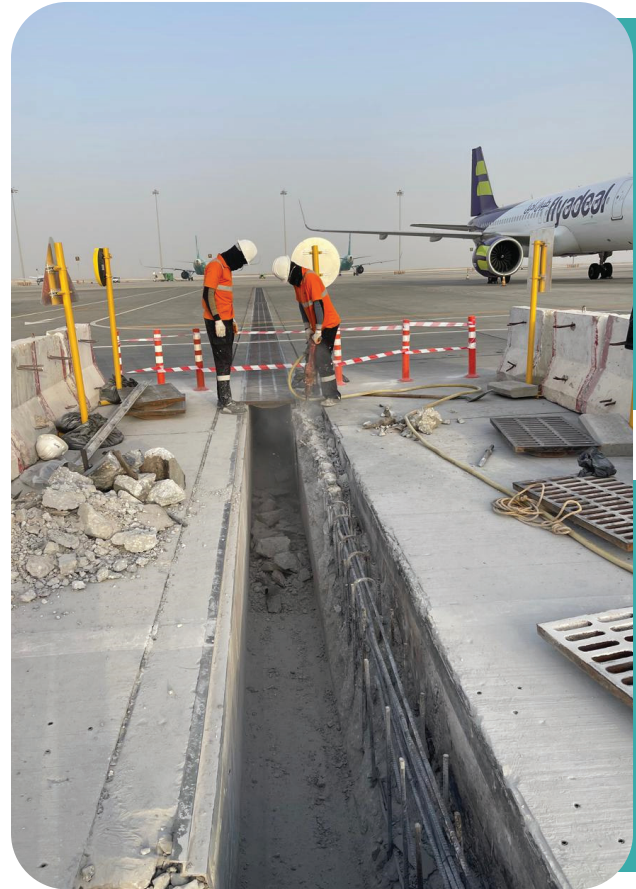

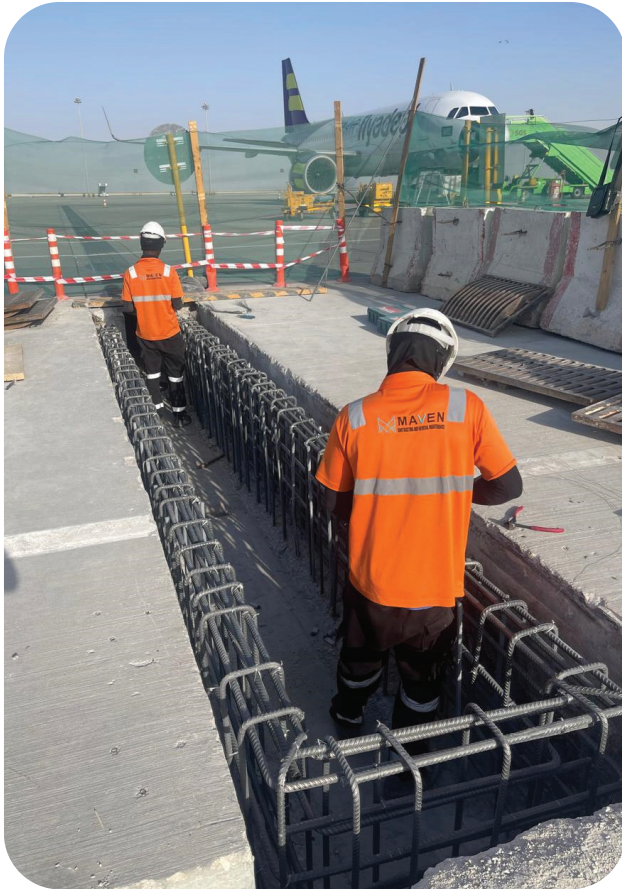

SCOPE OF WORK

Concrete repair works for apron slabs and drain trenches

WORK DESCRIPTION

- A. Demolition and removal of the deteriorated concrete and rusted rebars
- B. Anchoring & Installation the new reinforcement
- C. Formwork installation to create a framework for pouring the new concrete
- D. Casting Micro Concrete
- E. Curing method to keep the concrete moist and protected from rapid drying.

King Fahd Airport - Dammam

CLIENT

Dammam Airports Company (DACO)

SCOPE OF WORK

Waterproofing works for King Fahd Airport Buildings and Substations

WORK DESCRIPTION

- A. Removal of existing waterproofing
- B. Surface preparation for the existing roof
- C. Application of new waterproofing system
- D. Water leak test

Villa G33 Palm Jumeirah, Dubai

CLIENT

Interface Engineering & Contracting Co

SCOPE OF WORK

Strengthening of Trellis beam using CFRP wrapping system.

WORK DESCRIPTION

Supply and Installation of CFRP Wrap for Trellis Beam

The Westin Hotel - Ras Al Khaima

CLIENT

Fibrex Construction Group

SCOPE OF WORK

Strengthening and Retrofitting Works of the Existing Columns and Slab to resist the new imposed loads

WORK DESCRIPTION

- A. Concrete Jacketing for existing columns and slabs
- B. Conducting Non-Destructive Testing (GPR) to locate the position of post-tension tendons
- C. Coring works to create the opening for concrete pouring
- D. Anchoring & Installation of the new reinforcement for existing columns & slabs
- E. Formwork installation to create a mold for pouring the new concrete.
- F. Casting Micro Concrete
- G. Concrete curing to keep the concrete moist and protected from rapid drying.

Najmat Tower - Abu Dhabi

CLIENT

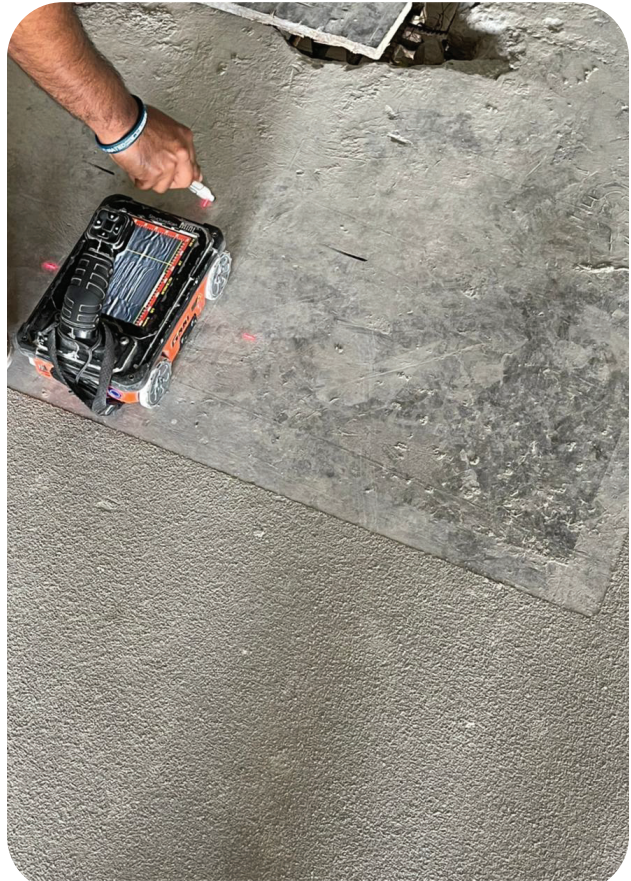

Engineering Construction & Reconstruction Co

SCOPE OF WORK

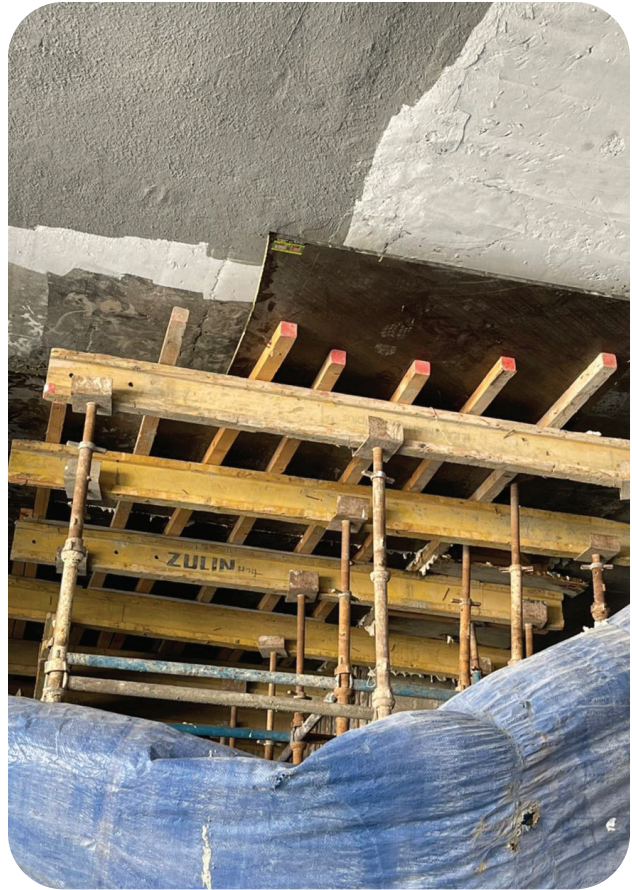

Rehabilitation and strengthening work for concrete slabs and columns due to fire impact

WORK DESCRIPTION

- A. Conducting non-destructive Testing (GPR) to locate the position of post-tension tendons
- B. Coring works to create the opening for concrete pouring
- D. Anchoring & Installation of the new reinforcement for existing columns & slabs
- E. Formwork installation to create a mold for pouring the new concrete.
- F. Casting Micro Concrete
- G. Concrete Curing to keep the concrete moist and protected from rapid drying.

Bentley Workshop - Abu Dhabi

CLIENT

Al Habtoor Motors

SCOPE OF WORK

- 1- Rehabilitation and repair work for concrete slab, wall, and beam on basement floor due to water leakage
- 2- Repair work for concrete arch

WORK DESCRIPTION

- A. Inspecting to determine the exact location and cause of the water leakage.
- B. Repairing the cracks and gaps that cause water leakage
- C. Removal of the deteriorated concrete and rusted rebars
- D. Anchoring & Installation of the new reinforcement
- E. Formwork installation to create a mold for pouring the new concrete.
- F. Casting Micro Concrete
- G. Concrete curing to keep the concrete moist and protected from rapid drying.

Canal Front Residences - Dubai

CLIENT

United Engineering Construction

SCOPE OF WORK

Modification Works For Lift Openings

WORK DESCRIPTION

- A. Assessment and evaluation of the existing structure to determine the required modification for the lift opening
- B. Design of the required strengthening works
- C. Concrete Cutting using core drilling machines to cut the existing concrete.
- D. Anchoring & Installation of the new reinforcement
- E. Formwork installation to create a framework for pouring the new concrete.
- F. Casting Micro Concrete
- G. Concrete curing to keep the concrete moist and protected from rapid drying

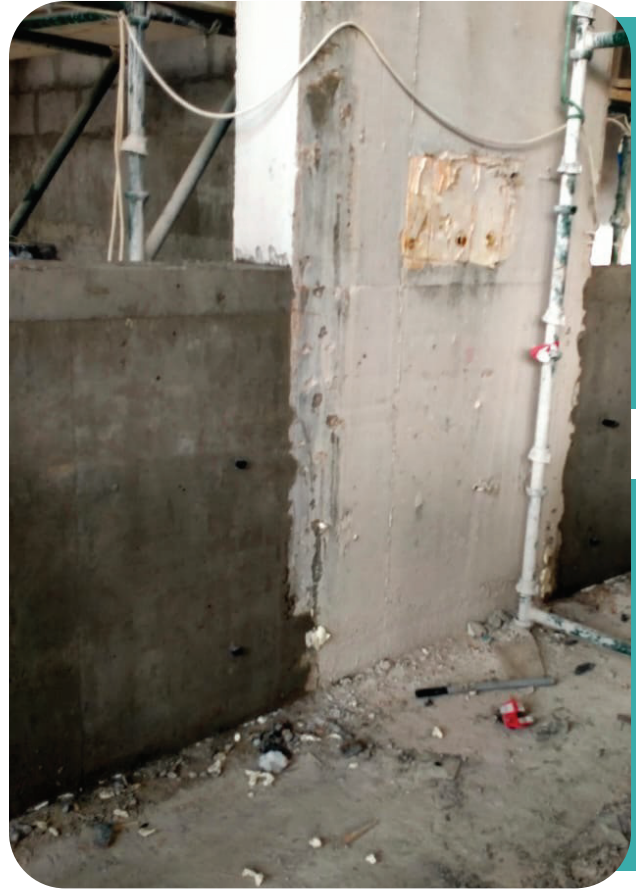

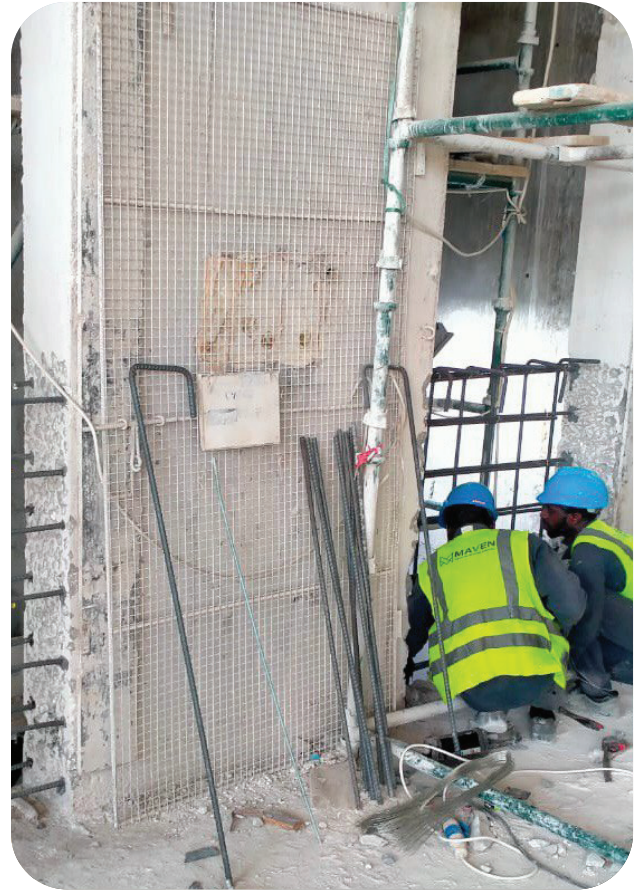

CANAL FRONT
RESIDENCES

MAIN MAJLIS BUILDING

Main Majlis Building - Bani Yas, Abu Dhabi

CLIENT

Burj Al Khair Engineering Office

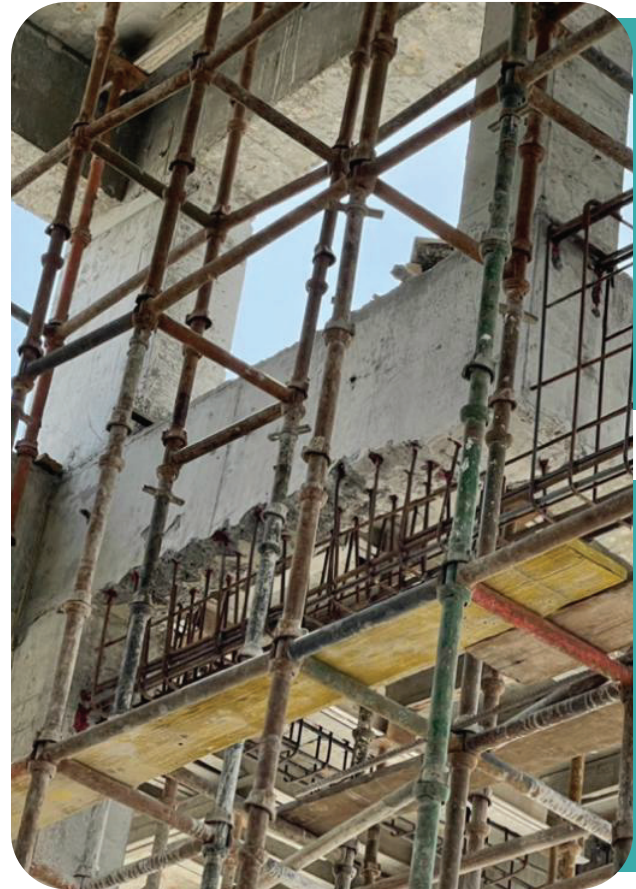

SCOPE OF WORK

Modification Works For Expansion of Building Entrance

WORK DESCRIPTION

- A. Assessment and evaluation of the existing structure and determine the required modification
- B. Concrete Cutting for existing columns using core drilling machines
- C. Rebar Anchoring
- D. Concrete Jacketing for existing footings, columns, and beams as per the new design requirements
- E. Concrete works for new beams as per the approved design
- F. Casting Micro Concrete

FIVE ► LUXE

Five Luxe Hotel - JBR, Dubai

CLIENT

Fibrex Construction Group

SCOPE OF WORK

Drilling into concrete columns for the installation of steel structure plates

WORK DESCRIPTION

- A. Conducting Non-Destructive Testing (GPR) to locate the position of column rebars
- B. Marking the drilling location based on the rebar scanning results
- C. Concrete drilling using a drill machine

DUBAI HILLS
ESTATE

Collective 1 & Collective 2 Towers - Dubai Hills Estate

CLIENT

Ginco General Contracting

SCOPE OF WORK

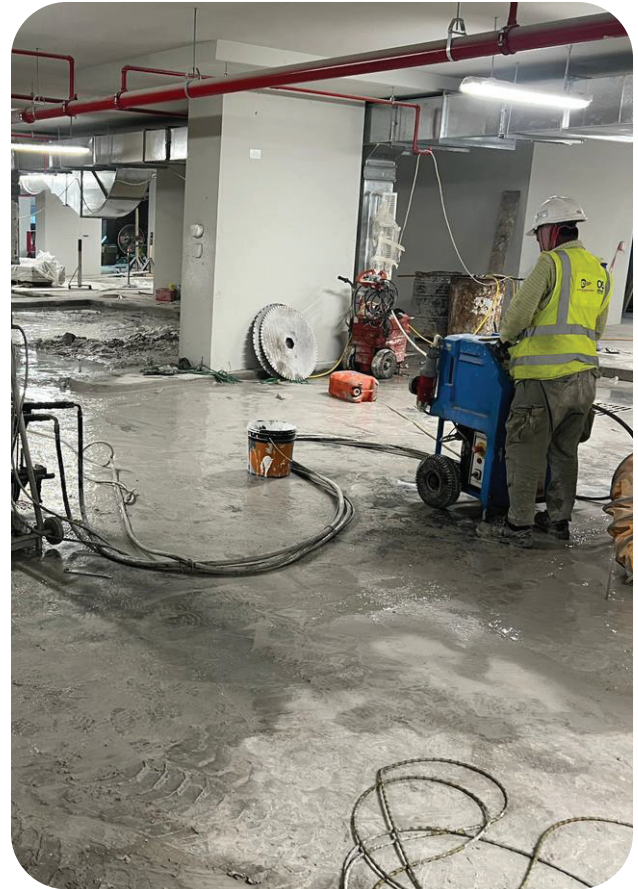

- 1- Post-tension slab Concrete Cutting for Shaft Opening and Installation of plumbing pipes
- 2- Concrete Cutting for Foundation on Basement Floor

WORK DESCRIPTION

- A. Conducting Non-Destructive Testing (GPR) to locate the position of post-tension tendons
- B. Concrete cutting using core drilling machines to cut the existing concrete.
- C. Concrete cutting for the foundation on the basement floor using a wire saw machine.

ARABIAN RANCHES III

Sun Townhouses - Arabian Ranches 3

CLIENT

Ginco General Contracting

SCOPE OF WORK

- 1- Wall Opening for AC ducting
- 2- Slab Opening at Roof Level for Installation of Access Hatch

WORK DESCRIPTION

- A. Concrete cutting using core drilling machines
- B. Controlled breaking of the concrete
